

Best IPTV Players for Android

To enjoy IPTV on your Android devices, you will need an IPTV player. Here are some of the best options available:

1. **IPTV Smarters Pro (Free)** / to download it use <http://aftv.news/6421807> or downloader code **6421807**
2. **XCIPTV (Free)** / <https://xtremehd-uk.com/xciptv.apk> or **9047098**
3. **TiviMate (Free for channels, Paid to watch movies and series.)**
4. **IBO Player Pro (7 days trial, into 10 dollars lifetime activation)**

Setting Up IPTV on Android Boxes and Android TVs

To set up [IPTV](#) on Android boxes and Android TVs, follow these steps:

Option 1: Download IPTV Apps from Google Play

A variety of IPTV apps are available for straight download from Google Play. While some of these apps provide a premium experience with extra features, others are available for free. The top applications that may be downloaded directly:

- **XCIPTV:** This program is FREE and lightweight, and it does the task well. has a decent EPG system; user interface is passable but not outstanding.
- **TiviMate:** Known as one of the best IPTV apps, TiviMate offers a great experience but requires a paid upgrade to access movies and series. The free version allows you to watch channels, but the Electronic Program Guide (EPG) can sometimes be buggy.
- **IBO Player Pro:** This is a paid app that offers a solid experience despite having a less intuitive user interface. It comes with a 7-day trial and a \$10 lifetime activation fee.

Option 2: Use IPTV Smarters Pro

For this method, you will need to download the **Downloader** app by AFTVnews from Google Play. Follow these steps:

1. **Download the Downloader App:**
 - Go to Google Play and search for “[Downloader by AFTVnews](#)“

Downloader by AFTVnews

1.
 - Install the app on your device.
2. **Enable Install from Unknown Sources:**
 - Go to your device's Settings.
 - Navigate to Security or Apps & Notifications. (this changes from device to device, sometimes you ll have to enable developer options first!)
 - Enable Install from Unknown Sources for the Downloader app.
3. **Install IPTV Smarters Pro:**
 - Open the Downloader app.
 - Enter the code **6421807** to download IPTV Smarters Pro.
 - Once installed, open the app.
4. **Log in Using Xtream Codes API:**
 - Choose the option to log in with Xtream Codes API.
 - Enter your login details provided in your email or WhatsApp.

Setting Up IPTV on Android Phones

The process for setting up IPTV on Android phones is similar to Android boxes and TVs. Follow these steps:

1. **Choose and Install an IPTV App:**
 - Download XCIPTV, TiviMate, or IPTV Smarters Pro(Using downloader)

2. Enter Your Subscription Details:

- Open the app and enter your subscription login details. Always use Xtream Codes API login mode.
- Follow the app's prompts to load your IPTV channels.

Troubleshooting

If you see an “Authorization Failed” message, please double-check your inputs, as this error is often caused by a typo.
